

LABO-HUB

**Biological Culture
& Heating & Drying**

Anaerobic Incubator

Features

- Equipped with large LCD screen display, high-precision microcomputer control (with timing function), it can accurately and visually reflect the actual temperature inside the incubator, over heating alarm adopted, safe and reliable.
- UV Sterilizer, effectively prevent bacterial contamination.
- Switch control for solenoid valve, it can accurately adjust the flow and input any necessary gas.
- Stainless steel cultivation and operation room, transparent impact-resistant glass front window for easy observation. Latex gloves are comfortable and reliable, easy to use.
- Operation room is equipped with deoxidization catalyst.
- The incubator is designed with a double widen door, it can put more petri dishes.
- Equipped with leakage protection.

Specifications

Model	LAI-3
Time for creating anaerobic state in sample chamber	< 5 minutes
Time for creating anaerobic state in operation chamber	< 1hr
Anaerobic environment maintenance time	> 12hrs (when no supply of mixed gas)
Temperature Range	RT+3~60°C
Temperature Stability	< ±0.3°C
Temperature Uniformity	< ±1°C
Display Resolution	0.1°C
Timing Range	1~9999min
Power Rating	600W
Power Supply	AC 220V, 50HZ
Net/Gross Weight (kg)	240/320
Interior Chamber Size (W×D×H)cm	30×19×29
Operation Chamber Size (W×D×H)cm	82×66×67
Exterior Size (W×D×H)cm	126×73×138
Package Size (W×D×H)cm	139×92×156

Anaerobic Incubator

Features

- Microprocessor controller ,large color touch screen,accurately control the temperature and gas in incubator,easy operation.
- The system adopts high precision temperature sensors, oxygen sensor, temperature control module and analog module to ensure high accuracy, good stability and high security, real-time monitoring of process data.
- UV Sterilizer,effectively prevent bacterial contamination.
- Switch control for solenoid valve, it can accurately adjust the flow and input any necessary gas.
- Stainless steel cultivation and operation room,transparent impact-resistant glass front window for easy observation. Latex gloves are comfortable and reliable,easy to use.
- Operation room is equipped with deoxidization catalyst.
- The incubator is designed with a double widen door,it can put more petri dishes.
- Imported oxygen sensors can observe oxygen concentration in the operating room at any time.
- Equipped with leakage protection.
- The operating room is equipped with special inoculating rod sterilizer and wax melting disinfection device.
- With USB interface, can store 6 months of data.

Specifications

Model	LAI-3T
Time for creating anaerobic state in sample chamber	< 5 minutes
Time for creating anaerobic state in operation chamber	< 1 hr
Anaerobic environment maintenance time	> 12 hrs.(when no supply of mixed gas)
Temperature Range	RT+3~60°C
Temperature Stability	< ±0.3°C
Temperature Uniformity	< ±1 °C
Display Resolution	0.1°C
Timing Range	1~9999min
Power Rating	600W
Power Supply	AC 220V,50HZ
Net/Gross Weight(kg)	240/320
Interior Chamber Size(W×D×H)cm	30×19×29
Operation Chamber Size (W×D×H)cm	82×66×67
Exterior Size (W×D×H)cm	126×73×138
Package Size(W×D×H)cm	139×92×156

CO₂ Incubator

Features

- Water jacket and air jacket structure are available, polished stainless-steel chamber with air duct. Equipped with fan for forced convection, ensuring good temperature uniformity and the balance of CO₂ concentration inside.
- PID microprocessor is used to control temperature, meanwhile, the temperature of box, water and door are separately controlled by three probes to ensure high accuracy. (Air jacket is equipped with two probes to control door temperature and main body temperature.)
- Digital display for setting parameters, each working state has LED indication.
- Alarm function for over-heating, lack of water, unspirated, ensuring the safe operation of the equipment.
- Equipped with sterile air filtration devices and UV light system to reduce pollution.
- Natural evaporation for humidification to ensure the chamber can maintain good humidity.
- The ratio of CO₂ gas and air can be arbitrarily selected according to the needs, direct reading type flow meter, accurate and easy operation.

Specifications

Model	WJ-2	WJ-2-160
Chamber Volume (L)	80	160
Temperature Range (°C)	RT+3 ~ 60	
Temperature Stability (°C)	≤±0.2	
Temperature Uniformity (°C)	≤±0.3	
Timing Range	1 ~ 9999min or without timing	
CO ₂ Range	0 ~ 20%	
Humidity Method	Natural Vaporization	
Power Supply	AC220V,50HZ	
Power Rating (W)	600	900
Chamber Size (W×D×H)cm	40×40×50	50×50×65
Exterior Size ((W×D×H)cm	57×59×93	69×69×103
Package Size(W×D×H)cm	64×68×103	70×78×118
Net/Gross Weight (kg)	55/85	75/110

CO₂ Incubator

CO₂ Incubator is widely used in modern medicine, biology, chemistry and agriculture science for the culture of biological cells, tissues and bacterial.

Features

- Microcomputer control, Large touch screen, accurate and easy for operation.
- Imported infrared sensor and gold-plated probes to ensure accuracy, the life time of sensor is up to 15 years.
- Adopting PID control technology, the CO₂ concentration can be freely set within range of 0 to 20%, alarm for over concentration and concentration rise too slow.
- Water jacket and air jacket structure are available, polished stainless-steel chamber with air duct. Equipped with fan for forced convection, ensuring good temperature uniformity and the balance of CO₂ concentration inside.
- When door opened, the fan will automatically turned off (WJ-3 turn off the CO₂ intake valve at same time) and heating will be stopped to reduce the pollution caused by the entry of air.

- PID microprocessor is used to control temperature, meanwhile, the temperature of box, water and door are separately controlled by three probes to ensure high accuracy. (Air jacket is equipped with two probes to control door temperature and main body temperature.)
- Digital display for setting parameters, each working state has LED indication.
- Alarm function for over-heating, lack of water, un aspirated, ensuring the safe operation of the equipment.
- Equipped with sterile air filtration devices and UV light system to reduce pollution.
- Natural evaporation for humidification to ensure the chamber can maintain good humidity.

Specifications

Model	WJ-3	WJ-3-160
Chamber Volume (L)	80	160
Temperature Range (°C)	RT+3 ~ 60	
Temperature Stability (°C)	±0.2	
Temperature Uniformity (°C)	±0.3	
Timing Range	1 ~ 9999min or without timing	
CO ₂ Range	0 ~ 20%	
CO ₂ Control Accuracy	± 0.1%(Imported sensor)	
Humidity Method	Natural Vaporization	
Power Supply	AC220V,50HZ	
Power Rating (W)	6600	900
Chamber Size (W×D×H)cm	40*40*50	50×50×65
Exterior Size ((W×D×H)cm	57*59*93	69×69×100
Net/Gross Weight (kg)	555/85	75/110
Alarm function	Over heating, damage for temperature probe, water shortage	

Shaking Incubator

Features

- Imported brand compressor (LYZ-200B).
- Integrated with incubator and shaker to save space and cost.
- ABS shell, polished stainless steel chamber.
- Large LCD screen to display temperature and shaking speed.
- With operation data memory function to eliminate faulty operation.
- Auto-recovery after power interruption as originally programmed.
- Auto-stop operation when door is opened. Strong air spring rod with easy opening and closing.
- Brushless DC motor, more stable and reliable.
- Equipped with leakage protection.

Specifications

Model	LYZ-103B	LYZ-100B	LYZ-200B
Shaking Speed (rpm)	20-300rpm		
Speed accuracy (rpm)	±1rpm		
Swing amplitude (mm)	Φ26		
Standard configuration	100ml×9	50ml×4, 100ml×4, 250ml×3, 500ml×3	50ml×5, 100ml×5, 250ml×4, 500ml×3
Maximum capacity	50ml×12, 100ml×9	50ml×20 or 100ml×16 or 250ml×12 or 500ml×9	100ml×20 or 250ml×16 or 500ml×12 or 1000ml×5 or 2000ml×4
Tray Size (mm)	295×253	400×370	450×410
Timing Range	1-9999min		
Temperature Range (°C)	RT+5 ~ 60°C	RT+5 ~ 60°C	4 ~ 60°C (Cooling)
Display Resolution (°C)	±0.1°C		
Temperature uniformity (°C)	±1°C		
Display	LCD		
Tray Included	1		
Exterior Size(W×D×H)mm	440×410×390	600×580×510	880×678×695
Package Size (W×D×H)mm	580×530×540	740×700×660	900×860×760
Net/Gross weight(kg)	31/41	72/88	81/113
Volume (W×D×H)mm	320×295×190 (18L)	440×405×270 (48L)	540×500×370(100L)
Power Rating	220W	320W	720W
Power Supply	AC 220 ~ 240V, 50 ~ 60Hz		

Shaking Incubator

Features

- Integrated with incubator and shaker to save space and cost.
- High quality steel shell, polished stainless steel chamber.
- Large LCD screen to display temperature and shaking speed.
- With operation data memory function to eliminate faulty operation.
- Non-volatile memory saves settings during a power outage and automatically restarts the unit as originally programmed after power is restored.
- Auto-stop operation when door is opened. Strong air spring rod with easy opening and closing.
- Brushless DC motor, more stable and reliable.
- With UV Sterilizer
- Equipped with leakage protection.

Specifications

Model	LYZ-111B	LYZ-211B	LYZ-111C	LYZ-211C

Power Supply	AC220V±10% , 50-60Hz			

Shaking Incubator

Features

- Integrated with incubator and shaker to save space and cost.
- High quality steel shell, polished stainless steel chamber.
- Unique slope design panel with large LCD display, better visual effect.
- With operation data memory and password locking function to eliminate faulty operation.
- Non-volatile memory saves settings during a power outage and automatically restarts the unit as originally programmed after power is restored.
- When the measured temperature deviates from set temperature by 3°C (can be set arbitrarily) will automatically stop heating and send out audible and visual alarms.
- LYZ-2102C, LYZ-2102, LYZ-2112B equips with strong and fast refrigeration system for instant cooling requirements, automatic defrost.
- The most advanced large torque motor to ensure continuous work without maintenance.
- With large view window and built-in lighting for easy observation.
- Low noise , luxury and beautiful appearance.
- Equipped with leakage protection.

Options

1. Universal Tray
2. Stainless steel flask clamp
(50ml,100ml,250ml,500ml,1000ml,,2000ml,3000ml,5000ml available)

Shaking Incubator

Features

- Stackable up to three units for maximum space savings.
- PID microprocessor temperature controller with high accuracy.
- With timing function, freely set the culture time within 0~999.9 hours;
- With over temperature alarm function, automatic power off in abnormal condition.
- Auto-recovery after power outage or crash as originally programmed, avoiding data loss.
- Mirror stainless steel chamber, anti-corrosion and easy to clean, good appearance.
- With observation window, convenient to observe condition inside any time;
- Independent control of temperature and shaking speed for each layer or separately run different layer according to needs.
- The rocking plate can be freely pulled out, which is convenient for loading and unloading the flask.
- Imported high-quality compressor, fluorine-free refrigerants, low noise and good cooling effect, ensuring long time stable operation of equipment under low temperature.
- Large LCD screen display, easy operation.
- Auto-stop operation when door is opened, safe and convenient.
- With UV sterilization function;

Options

LCD touch screen is optional. It can display setting parameters for temperature, shaking speed, time and actual measured temperature, speed, remaining time on one interface for easy observation.

Specifications

Model	LYZ-D2403
Shaking Speed (rpm)	60~280
Speed Accuracy (rpm)	±1
Swing Amplitude (mm)	Φ28mm
Maximum Capacity	250ml×36 or 500ml×24 or 1000ml×15 or 2000ml×10
Tray Size (mm)	770×450
Timing Range	0~999(h)
Temperature Range (°C)	4~60°C (Ambient temperature : 25°C)
Temperature Accuracy (°C)	±0.1°C (Under constant temperature)
Temperature Uniformity (°C)	±1°C
Tray Included	1
Exterior Size(W×D×H)mm	1200×670×2100 (mm)
Power Rating(W)	2700
Power Supply	AC220V±10%, 50 ~ 60HZ

Heating Incubator

Features

- Unique air duct design, good temperature uniformity.
- Microprocessor controller (with temperature correction and timing function).
- Large LCD screen display.
- High quality stainless steel chamber, removable shelf, easy-to-clean.
- Silicon sealing ring for reliable sealing.
- With inner glass door for easy observation, open the outer door for observation will not affect the temperature inside.
- Equipped with leakage protection.
- Equipped with spare temperature control which ensures the product work normally even the main temp. control failed.
- Optional printer or RS485 interface which can print or connect computer to realize remote control and alarm.
- Anti-hot handle

Technical Parameters

1. Temp. range: RT+ 5°C ~66°C
2. Temp. fluctuation: ±0.5°C .
3. Temp. uniformity: ±1°C
4. Temp. resolution: 0.1°C
5. Power supply: AC 220V,50HZ

Options

1. Multi-segment programmable control
2. Built-in printer
3. RS485 interface
4. UV sterilizer

Forced Air Drying Oven

Features

- Horizontal forced air type, good temperature uniformity.
- Microprocessor controller (with temperature correction and timing function), accurate and reliable.
- Large LCD screen display.
- High quality stainless steel chamber, removable shelf, easy-to-clean.
- Equipped with multiple sets of heaters. (For LDO-101 Series)
- Adopt temperature selection switch which can select the grade according to the heating speed and operating temperature. (For LDO-101 Series)
- Silicon sealing ring for reliable sealing.
- Equipped with leakage protection.
- Equipped with spare temperature control which ensures the product work normally even the main temp. control failed.
- Optional printer or RS485 interface which can print or connect computer for remote control and alarm.
- Anti-hot handle

Technical Parameters

1. Temp. fluctuation: $\pm 1^{\circ}\text{C}$.
2. Temp. uniformity: $\pm 2.5^{\circ}\text{C} \%$.
3. Temp. resolution: 0.1°C
4. Timer: 1~9999m

Options

1. Multi-segment programmable control
2. Built-in Printer
3. RS485 interface

Vacuum Drying Oven

Features

- Microprocessor controller with LCD display, more accurate and reliable.
- Polished stainless steel chamber, durable and easy to clean.
- Tempered, bullet-proof double glass door ensure the safety of operator and clear observation of the chamber.
- Door tightness can be adjusted, silicon sealing. To keep vacuum states in the chamber, can fill working chamber with inert gas (inflation pressure ≤ 0.1 MPa).
- Storage, heating, testing and drying can be performed in the environment without oxygen or in an inert atmosphere. It will not cause oxidation.
- Equipped with leakage protection.

Options

- Microprocessor controller
- Built-in printer
- RS485 connector
- Inert gas inlet valve
- Small vacuum pump (6020, 6050)
- Large vacuum pump (6090, 6210)

Specifications

Model	LVO-1B(6050)	LVO-0B(6020)	LVO-6090	LVO-6210	LVO-6933

Display Resolution (°C)	0.1		
Vacuum Degree	<133 Pa		
Chamber Size (W×D×H)cm	42×35×37	45×45×45	56×60×64
Volume(L)	54	91	215
Package Size (W×D×H)cm	70×66×155	78×76×163	89×92×193
Net/Gross Weight (kg)	75/106	90/145	145/195

Biochemical Incubator

Features

- Imported compressor, automatic control for hot and cold.
- Microprocessor temperature control with large LCD display, high precision.
- Polished stainless steel chamber, moveable shelves can be freely adjusted, easy for cleaning.
- Equipped with power supply outlet and lamp inside, easy observation.
- The chamber equipped with fan for forced convection.
- The surface coated, good appearance and maintenance.
- Double door design, the inner door is made of tempered glass for easy observation, magnetic sealing design for outer door, good sealing.
- Equipped with leakage protection.
- Equipped with spare temperature control which ensures the product work normally even the main temperature control failed (for heating).
- RS485 connector to connect computer and printer, temperature and time data can be displayed on computer and print.

Options

- Multi-segment programmable control
- Built-in printer
- Φ25mm (50mm) test hole
- RS485/232 connector
- Wireless alarm system (SMS alarm system)

Constant Temperature & Humidity Chamber

Features

- Imported international brand compressor with cooling system, effectively extend the life of the compressor.
- Imported brand humidity sensor, built-in tank heating humidification system, effectively ensuring the humidity deviation.
- Large LCD screen to display more data at same time. Menu-type operation interface, easy operation.
- Digital display for temperature and humidity, multi-segment program control technology, high precision.
- PID microprocessor ensures precise control for temperature and humidity.
- There are 99 cycles of program, each cycle is divided into 30 segments, each segment contains 99 hours and 99 minutes of cycle steps, it can happily meet almost all the complicated experiment process.
- Temperature-limiting alarm system ensures experiment runs safely. If the temperature exceeds the limit, the operation will be automatically stopped and alarm will prompt the operator.
- Polished stainless steel chamber, surface painted, adjustable shelves, easy for cleaning.
- Equipped with power supply and UV lamp for sterilization in chamber.
- Double door designed, tempered glass inner door for easy observation.
- JAKEL circulation fan, reasonable air duct structure, effectively guarantee the temperature stability inside the box.

- Equipped with leakage protection.
- Equipped with spare temperature control which ensures the product work normally even the main temp. control failed. (for heating).
- Equipped with UV sterilization device.

Options

- Built-in printer
- $\phi 25\text{mm}$ (50mm) test hole
- Wireless alarm system (SMS alarm system)
- RS485 connector

Performance parameters are tested under non-load conditions: ambient temperature is 20°C, relative humidity is 50% RH

Growth Chamber

Features

- Adopt imported fluorine-free compressor, environment friendly and reliable.
- Adopt imported brand humidity sensor, with self-designed built-in water tank and electric heating humidifying system, ensuring high accuracy for humidity.
- Double door design, the inner door is made of tempered glass, can directly observe the culture in the working chamber. the outer door is magnetically sealed.
- Large LCD screen
- Adopt mirror stainless steel inner tank, shelves inside the chambers can be freely adjustable without tool, convenient for disinfection and cleaning.
- The left bottom side is equipped with detachable water level sensor to control the humidifying of tank, which is convenient for operators to check and repair.
- 3 sides light and 6 levels can be adjusted

Medicine Stability Testing Chamber

Features

- Dual refrigeration system.
- Imported compressor with self-developed compressor cooling system, extend service life of the compressor.
- Imported humidity sensor, ensuring high accuracy of humidity.
- PID control for temperature and humidity, more accurate, easy menu operation interface.
- Over-temperature alarm system: automatically stop working when exceeded the limit temperature and send out audible and visual alarm, ensure experiments run safely.
- Large LCD screen to display more data at same time.
- Newest multi-segment programmable control technology for temperature and humidity, high precision. With multiple programs and multiple cycles, each cycle is divided into 30 segments, each segment contains 99 hours and 99 minutes of cycle steps, it can happily meet almost all the complicated experiment process.
- Equipped with JAKEL circulation fan, unique designed air duct for good air circulation, ensuring good temperature uniformity inside.
- Equipped with built-in stainless steel water tank at the bottom of equipment to supply water by pump for the humidification tank.
- Equipped with spare temperature control which ensures the product work normally even the main temp. control failed (for heating).
- Equipped with printer which can record and print the operating parameters at any time.

- Mirror stainless steel chamber, adjustable shelf.
- The chamber is equipped with a power socket and UV lamp for sterilization.
- Double door design. Tempered glass inner door for clear observation. The outer door adopts magnetic seal design, good sealing performance.

Safety Device

- Over temperature protection
- Compressor over current protection
- Over compressing protection
- Water shortage protection
- Heater overheat protection
- Audible and visual alarm system

Water Bath

Thermostatic water tank

Features

Microprocessor control with timing and temperature correction function.

- The shell is made of high quality steel plate ,surface coated.
- The chamber, frame and top cover are made of stainless steel.
- Between the inner and outer space are filled with high-quality insulation materials,anti-corrosive and good appearance.
- LCD display

Desktop Freeze Dryer

Application

The desktop freeze dryer series is divided into four types: ordinary type: manual gland type, multi-manifold type, gland multi-manifold type.

It is a new drying method that uses the sublimation performance of water under low temperature and low pressure conditions to dehydrate the material at low temperature and achieve drying.

Features

- Rapid cooling, uniform temperature on the inner wall of the cold trap, professional gas diversion technology, good water replenishment effect;
- Adopt brand compressor, single machine mixed environmental protection refrigeration technology;
- Equipped with cold trap sample pre-freezing function, no need for ultra-low temperature refrigerator or liquid nitrogen treatment;
- 7-inch color LCD touch screen, friendly human-computer interaction interface, equipped with lock screen function, and optional mobile phone and computer remote control;
- The main interface of the display screen is simple and clear, showing parameters such as cold trap temperature, vacuum degree, sample temperature, running time, etc. The operation is simple and direct, and the management authority for misoperation is also set;
- With data viewing, exporting and deleting functions, freeze-dried data is automatically saved, which can effectively prevent data loss, and also supports USB data export;
- Supports lyophilization of ampoules, vials, glass flasks, plasma vials or trays;
- The cold trap has the independent pre-freezing function of the sample in the early stage, and is equipped with a defrosting function;
- Built-in maintenance reminder function to remind users of instrument maintenance;
- With vacuum alarm function, it can timely remind users whether the vacuum degree is

normal;

- Equipped with high-precision micro-adjustment vacuum valve, which can realize micro-adjustment of vacuum degree;
- The vacuum connection pipe is made of stainless steel anti-corrosion material, and comes with standard KF25 vacuum clamp.
